Denis Faraci

Gameplay Systems Programmer

Milan, Italy | +39 339 1172868 | denis.faraci.dev@gmail.com | Portfolio | GitHub | Playable Builds

SUMMARY

Gameplay Systems Programmer with 2+ years of experience in **Unreal Engine 5 (C++)** and **Unity (C#)**, specializing in scalable gameplay systems, AI architecture and reusable data-driven frameworks.

Shipped **3 games on Steam** and **various games on Itch.io**, including *Negative Edge*, showcased at **Gamescom** and **DevGAMM**, *Golem Rumble* a multiplayer PvP battle arena and *Weabot*, a singleplayer puzzle-adventure game.

SKILLS

- **Unreal Engine 5**: Gameplay systems programming in C++ and Blueprints, reusable gameplay framework, Gameplay Ability System, CommonUI, MassEntity, Unreal Insights, Replication, data-driven design and editor tools.
- **Unity**: Gameplay systems programming in C#, reusable gameplay framework, editor tools.
- **Game AI**: Behavior Trees, StateTree, Squad System, Perception System, GOAP System and other plugins, designed as reusable, data-driven AI systems.
- **Gameplay Systems**: Inventory, RPG mechanics, weapons, progression, save systems and achievements built as modular, reusable plugins.
- **Programming**: C++, C#, software architecture, memory management and performance optimization.
- **Networking & Services**: Unreal Replication, Mirror, Steamworks and Google Play Services.
- **Tools & Workflow**: Python automation, Unreal editor utilities, Git / Git-Flow, Jira, HacknPlan and CI/CD pipelines.
- **UI Programming**: Unreal UMG / Slate and Unity UI Toolkit.

EXPERIENCE

Villains Studio - Negative Edge — Gameplay Programmer *Unreal Engine 5.5* | *Nov 2024 – Jul 2026*

- Developed core gameplay systems including AI, inventory, weapons, RPG mechanics, UI and data management.
- Created VGOAP, a performance-oriented GOAP framework with multithreaded planning and streamlined AI configuration, reused across multiple projects.
- Defined gameplay architecture and technical solutions in close collaboration with design, art and audio.
- **Result:** released on Steam; showcased at **Gamescom** and **DevGAMM**.

Villains Studio - Golem Rumble — Gameplay Programmer *Unreal Engine 5.5* | *Mar 2026 – Apr 2026*

- Implemented gameplay systems for a multiplayer PvP project, including AI, UI, trap mechanics, team management and gameplay flow.
- Developed a modular Battle Pass plugin featuring encrypted save data, cosmetic management and tutorial progression through a state machine.
- **Result:** released on Steam; showcased at **IGDA**.

Independent - Weabot — Gameplay Programmer *Unreal Engine 5.3* | *Jan 2024 – Jul 2024*

- Designed the gameplay architecture and implemented modular inventory, save, AI, UI and quest systems.
- Worked closely with designers and artists to translate gameplay requirements into reusable systems.
- **Result:** released on Steam and Itch.io.

Independent - Self — Sole Programmer *Unreal Engine 5.4* | *Nov 2024 – Dec 2024*

- Independently designed and implemented the project architecture, AI, character controls, UI, inventory and core gameplay mechanics.
- Built an input registration system driving the game's core horror mechanic.
- **Result:** released on Itch.io; showcased at **IGDA**.

EDUCATION

Event Horizon School *Oct 2022 – Oct 2025*

Game Programming course (1000+ hours) focused on Unity C# and Unreal Engine C++. **Final Grade: 30/30**

I.T.I.S. "C. Facchinetti" *Sep 2015 – Oct 2022*

Computer Science and Software Engineering program. **Final Grade: 94/100**

LANGUAGES

Italian – Native; **English** – B2 Professional working proficiency.
