

Denis Faraci

Gameplay Systems Programmer

Milan, Italy | +39 339 1172868 | denis.faraci.dev@gmail.com | Portfolio | GitHub | Playable Builds

SUMMARY

Gameplay Systems Programmer with 2+ years of experience in **Unreal Engine 5 (C++)** and **Unity (C#)**, specializing in scalable gameplay systems, AI architecture and reusable data-driven frameworks.

Shipped **2 games on Steam** and **various games on Itch.io**, including *Negative Edge*, showcased at **Gamescom** and **DevGAMM** and *Golem Rumble* a multiplayer PvP battle arena.

SKILLS

- **Unreal Engine 5:** Gameplay systems programming in C++ and Blueprints, reusable gameplay framework, Gameplay Ability System, CommonUI, MassEntity, Replication, data-driven design and editor tools.
- **Unity:** Gameplay systems programming in C#, reusable gameplay framework, editor tools.
Game AI: Behavior Trees, GOAP architecture and custom decision-making frameworks, designed as reusable, data-driven AI systems.
- **Gameplay Systems:** Inventory, RPG mechanics, weapons, progression, save systems and achievements built as modular, reusable frameworks.
- **Programming:** C++, C# object-oriented design, software architecture, memory management and performance optimization.
- **Networking & Services:** Unreal Replication, Mirror, Steamworks and Google Play Services.
- **Tools & Workflow:** Python automation, Unreal editor utilities, Git / Git-Flow, Jira, HacknPlan and CI/CD pipelines.
- **UI Programming:** Unreal UMG / Slate and Unity UI Toolkit.

EXPERIENCE

Negative Edge — Gameplay Programmer *Unreal Engine 5.5 | Nov 2024 – Jul 2026*

- Built core systems such as: inventory, weapons, character stats, UI, AI and data management.
- Designed and implemented VGOAP, a fully data-driven GOAP framework, driving all AIs decision-making and reused across multiple projects.
- Led gameplay architecture decisions, working closely with design, art and audio to solve implementation challenges.
- **Result:** showcased at **Gamescom** and **DevGAMM**; released on Steam.

Golem Rumble — Gameplay Programmer *Unreal Engine 5.5 | Mar 2026 – Apr 2026*

- Built AI systems, UI features and progression mechanics for a live-service style project.
- Developed a modular Battle Pass system with encrypted save data and cosmetic skin management, built for easy reuse in future projects.
- **Result:** showcased at **IGDA**; released on Steam.

Weabot — Gameplay Programmer *Unreal Engine 5.3 | Jan 2024 – Jul 2024*

- Designed gameplay architecture and built modular inventory, save, AI, UI and achievement systems.
- Delivered reusable gameplay solutions in close collaboration with designers and artists.
- **Result:** released on Steam and Itch.io.

Self — Sole Programmer *Unreal Engine 5.4 | Nov 2024 – Dec 2024*

- Sole programmer on the project: owned architecture and implementation of AI, character controls, UI and inventory.
- Built a custom Input Register System to drive core horror mechanics.
- **Result:** showcased at **IGDA**; released on Itch.io.

EDUCATION

Event Horizon School *Oct 2022 – Oct 2025*

Game Programming course (1000+ hours) focused on Unity C# and Unreal Engine C++. **Final Grade: 30/30**

I.T.I.S. "C. Facchinetti" *Sep 2015 – Oct 2022*

Computer Science and Software Engineering program. **Final Grade: 94/100**
